6. Research Coordinator: combine the participant responses to questions 3 and 4 and circle one Fitzpatrick skin phototype

<table>
<thead>
<tr>
<th>Skin type; Erythema and Tanning Reactions to the first exposure in summer</th>
</tr>
</thead>
<tbody>
<tr>
<td>I  Always burns, never tans (painful burn at 24 hrs and no tan at 7 d)</td>
</tr>
<tr>
<td>II  Burns easy, then develops light tan (painful burn at 24 hrs and a light tan at 7 d)</td>
</tr>
<tr>
<td>III  Burns moderately, then develops light tan (slightly tender burn at 24 hrs, moderate tan at 7 d)</td>
</tr>
<tr>
<td>IV  Burns minimally-rarely, then develops moderate tan (no burn at 24 hrs and a good tan at 7 d)</td>
</tr>
<tr>
<td>V  Never burns, always develops dark tan</td>
</tr>
<tr>
<td>VI  Never burns, no noticeable change in appearance</td>
</tr>
</tbody>
</table>

7. Dermatologist ask the burning and tanning question using a specific time period like Memorial Day weekend. Circle the one skin phototype that you would choose based on participant responses to sun burn/suntan questions.
