*Paired images were shown twice, once in gray-scale and once in color.

Un-paired analysis was performed by combining responses from both the un-paired gray scale and color images, as well as responses from the 20 paired images when they were shown for the first time.

**Abbreviations:** SK: seborrheic keratosis; BCC: basal cell carcinoma; DF: dermatofibroma; SCC: squamous cell carcinoma; AK: actinic keratosis.

**Years Using Dermoscopy?**  
________ year(s)  

**Do you have any formal training in dermoscopy, such as attending dermoscopy courses or instruction during residency?**  
☐ Yes  ☐ No  

**Instructions:** For each dermoscopic image indicate the most likely diagnosis using the following answer choices. In the corresponding gray shaded boxes, list your level of confidence in your diagnosis from a scale of 1-5, where 5 indicates 100% confidence and 1 indicates minimal confidence.

A. Nevus/Spitz  
B. Melanoma  
C. BCC  
D. SCC/AK  
E. Dermatofibroma  
F. SebK/Solar Lentigo  
G. Hemangioma
