Supplementary Online Content

eFigure 1A. Buttocks of a white woman in her 50s
eFigure 1B. Perianal area for the woman shown in Figure 1A
eFigure 2. Dark brown melanocytic nevus in the gluteal cleft

This supplementary material has been provided by the authors to give readers additional information about their work.
**eFigure Legends**

**eFigure 1A.** Buttocks of a white woman in her 50s. While typical melanocytic nevi are evident, scattered over the buttocks, the perianal area is hidden. She has prominent and atypical nevi elsewhere on the skin. She denied a personal or family history of cutaneous melanoma.

**eFigure 1B.** Perianal area for the woman shown in Figure 1A. There are multiple melanocytic nevi in the gluteal cleft and anal margin, visible only when the buttock cheeks are physically spread.

**eFigure 2.** Dark brown melanocytic nevus in the gluteal cleft. This nevus is visible only when the buttock cheeks are physically spread. This white woman in her 40s has prominent and atypical nevi elsewhere on the skin. She denied a personal or family history of cutaneous melanoma.
