Fuller JC, Levesque PA, Lindsay RW. Assessment of the EuroQol 5-dimension questionnaire for detection of clinically significant global health related quality-of-life improvement following functional septorhinoplasty. JAMA Facial Plast Surg. Published online November 23, 2016. doi:10.1001/jamafacial.2016.1410

eFigure. EuroQol 5-Dimension (EQ5D) Domain vs Baseline Nasal Obstruction Symptom Evaluation (NOSE)

This supplementary material has been provided by the authors to give readers additional information about their work.
Diamonds represent patients reporting problems and squares represent patients reporting no problems in each of the specific health domains of the EQ5D. The symbols indicate means, and the error bars, the 95% confidence interval. Asterisks indicate statistically significant values. There is no diamond in the area of self-care, as no patients reported problems in this domain.
