Supplementary Online Content

**eFigure.** Transorbital approach for endoscopic repair of frontal sinus fractures, using superior eyelid crease and/or blepharoplasty incision

This supplementary material has been provided by the authors to give readers additional information about their work.

**eFigure.** Transorbital Approach for Endoscopic Repair of Frontal Sinus Fractures, Using Superior Eyelid Crease and/or Blepharoplasty Incision

A, Shaded area indicates target area of superior eyelid crease approach. B, Dashed line indicates the plane of dissection following the orbital septum to the superior orbital rim. C, The periosteum is incised at the inferior aspect of the orbital rim, and the dissection proceeds endoscopically between the periosteum and the orbital roof, exposing the frontal sinus fracture.
