Supplementary Online Content

Auerbach AD, Wachter RM, Cheng HQ, Maselli J, McDermott M, Vittinghoff E, Berger MS.

eAppendix. Adjustment information.

This supplementary material has been provided by the authors to give readers additional information about their work.
Appendix. Adjustment information.

Mortality rate models adjusted for race; admit source; diagnosis-related group (DRG) risk of mortality; whether the patient had a general medicine consultation, another consultation, or comanagement; comorbid illnesses (diabetes mellitus, metastatic cancer, obesity, fluid and electrolyte disorders, deficiency anemia); and clustering by attending physician.

Readmission models adjusted for age; sex; race; admit source; whether the patient had a general medicine consultation, another consultation, or comanagement, and comorbid illnesses (paralysis and renal failure); and clustering by attending physician.

Length-of-stay models adjusted for age; type of insurance; admit source; DRG risk of mortality; whether the patient had a general medicine consultation, another consultation, or comanagement, and comorbid illnesses (paralysis, obesity, fluid and electrolyte disorders); and clustering by attending physician.

Cost models adjusted for age; type of insurance; admit source; DRG risk of mortality; whether the patient had a general medicine consultation, another
consultation, or comanagement, and comorbid illnesses (paralysis, renal failure, liver disease, and fluid and electrolyte disorders); and clustering by attending physician. Patient satisfaction survey models adjusted for age, DRG risk of mortality, and clustering by attending physician.
