eAppendix. Search strategy for Medline (using PubMed)

This supplementary material has been provided by the authors to give readers additional information about their work.
To find RUS studies, the YNNH imaging database was queried for these words and phrases: “creatinine” or “cr” (when used as an abbreviation), “renal failure,” “stone,” “nephrolithiasis,” “flank pain,” “arf,” “obstruction,” “hydronephrosis,” and “retention.

Incidental findings were found by searching the radiologist’s report text for these words: “solitary” or “single” (kidney), “extra-renal” or “double” (pelvis), “complex” (cyst), “polycystic” (kidney disease), “angiomyolipoma”, and “horseshoe” (kidney).
