

Data Sharing Statement

King. Effects of Counseling by Peer Human Advisors vs Computers to Increase Walking in Underserved Populations. *JAMA Intern Med*. Published September 28, 2020. 10.1001/jamainternmed.2020.4143

Data

Data available: Yes

Data types: Other (please specify)

Additional Information: We will make the final data collected available in electronic form to researchers who request them as part of the following data approval process: We will request that researchers submit a data request in writing to the project principal investigator so that the requested data can be made available while protecting the confidentiality of study participants, avoiding overlap with planned data analyses by the investigator group, and limiting duplication of data analysis activities.

How to access data: See above. The email address to request the data is as follows: king@stanford.edu (Abby King, study PI)

When available: With publication

Supporting Documents

Document types: None

Additional Information

Who can access the data: Researchers whose proposed use of the data has been approved by the principal investigator and investigator team

Types of analyses: The types of analyses for which the data will be made available include those that extend the knowledge base in the field and avoid or limit duplication with investigator-planned or conducted analyses

Mechanisms of data availability: Data will be made available with investigator support after approval of a proposal and an accompanying signed data access agreement.
