Abbreviation: CPT, Current Procedural Terminology.

<sup>a</sup>Medicare prices are average national nonfacility professional fees obtained from the 2016 Medicare Physician Fee Schedule before geographic or other adjustments. Average commercial insurer professional fees were calculated from paid claims in the 2016 Truven

MarketScan Commercial Claims and Encounters Database. The Truven MarketScan database is one of the largest convenience samples of commercially insured individuals in the United States and contains claims from about 350 payers. No weighting was included in the calculation; all plan types other than capitation and point of service with capitation were included because capitated prices may not be individually reflected on each claim line.
