eFigure. Rates of Inappropriate PCI for Nonacute Indications by Hospital Status

This supplementary material has been provided by the authors to give readers additional information about their work.
eFigure. Rates of Inappropriate PCI for Nonacute Indications by Hospital Status

The following box plot depicts private hospital and public hospital rates of inappropriate PCIs for non-acute indications. The information conveyed by the box plot includes: inter-quartile range of hospital rates (vertical rectangle), median hospital rate (horizontal line in rectangle), mean hospital rate (dot in rectangle), and range of hospital rates (upper and lower limit of vertical line). The median hospital rate and inter-quartile range for inappropriate PCIs were similar for public and private hospitals.
