Data Sharing Statement

Data

Data available: Yes
Data types: Other (please specify)
Additional Information: Will be made available upon reasonable request in adherence with open sharing practice
How to access data: Data related to the specific manuscript will be made available upon reasonable request in adherence with transparency conventions in medical research and through requests to the corresponding author (juliorosenstock@dallasdiabetes.com). The steering committee of CARMELINA has predeveloped a comprehensive analysis plan and pre-specified numerous analyses, that will subsequently be followed by scientific presentations and publications. The full database will at a later timepoint be made available in adherence with the ratified transparency policy which is detailed here: https://trials.boehringer-ingelheim.com/transparency_policy.html.
When available: With publication, beginning date: 12-01-2020

Supporting Documents

Document types: None

Additional Information

Who can access the data: Researchers whose proposed use of the data has been approved
Types of analyses: For clinical scientific interpretation and publication
Mechanisms of data availability: After approval from the steering committee and later after approval from the committee that steers the access according to the transparency policy
Any additional restrictions: See datasharing statement
