Data Sharing Statement

Lauffenburger. Effectiveness of Targeted Insulin-Adherence Interventions for Glycemic Control Using Predictive Analytics Among Patients With Type 2 Diabetes. JAMA Netw Open. Published March 15, 2019. 10.1001/jamanetworkopen.2019.0657

Data
Data available: No

Additional Information
Explanation for why data not available: Due to data privacy and confidentiality concerns and the specific agreement with the health insurer, public sharing of the raw patient-level data may not be possible. Other researchers wishing to access the raw data will need to directly negotiate data use agreements with parties participating in our Center projects and meet their relevant data security and privacy requirements. Algorithms and programming code are available upon request.
