
**eFigure.** Western blots with antibody to optineurin.

This supplementary material has been provided by the authors to give readers additional information about their work.
eFigure. Western blots with antibody to optineurin. Twenty micrograms of protein from spinal cord homogenates of patients with amyotrophic lateral sclerosis (ALS) or Duchenne muscular dystrophy were loaded and blotted using rabbit antihuman optineurin C terminal polyclonal antibody (C-term). Lane 1, non-\textit{SOD1} familial ALS; lanes 2-4, sporadic ALS; lane 5, Duchenne muscular dystrophy. A single optineurin band of the expected size detected is indicated by an arrow. Molecular weight (MW) is indicated on the left in kilodaltons. Lower panel, actin control.
