eFigure. Genomic Comparison of Primary Versus Metastatic SBA Tissue Biopsies

This supplementary material has been provided by the authors to give readers additional information about their work.
**Supplemental Figure.** Genomic comparison of primary versus metastatic SBA tissue biopsies.

Frequency of genomic alterations in primary biopsies (n = 191) compared with metastatic biopsies (n = 126) cases. Graph includes genes altered in >5% of cases in either series. *P < 0.05.
Supplemental Figure 1.
