
eFigure. Flowchart for Enrollment, Diagnostic Examinations, Imaging, and Image Grading

This supplementary material has been provided by the authors to give readers additional information about their work.
Figure 1: Flow Chart on the enrollment, diagnostic exam, imaging, and image grading

1284 infants (BW < 1251g) enrolled

27 infants exited the study without any diagnostic exam after enrollment

1257 infants underwent 4263 sessions of diagnostic exam

244 (19.4%) infants diagnosed with RW-ROP

1013 (80.6%) infants diagnosed without RW-ROP

2 infants without any images taken

14 infants without any images taken

242 infants with RW-ROP had images available

999 infants diagnosed without RW-ROP had images available

All 242 infants selected

Random sample of 613 infants selected

1759 image sets from 454 eyes with RW-ROP (7 eyes had RW-ROP diagnosed after last image session)

150 image sets from 30 eyes without RW-ROP (because unilateral RW-ROP)

3611 image sets from 1225 eyes without RW-ROP

Total of 5520 image sets from 855 infants graded by Trained Readers

Random sample of 1312 image sets from 200 infants graded by Expert Readers
