**eFigure.** Montreal Cognitive Assessment (MoCA) Test

This supplementary material has been provided by the authors to give readers additional information about their work.
Montreal Cognitive Assessment (MoCA) test is a cognitive screening tool developed to detect mild cognitive dysfunction. It assesses different cognitive domains: attention and concentration, executive functions, memory, language, visuoconstructional skills, conceptual thinking, calculations, and orientation. The total possible score is 30 points, and a score of 26 or above is considered normal.
