eFigure. Clinical Case.

A patient was diagnosed with a choroidal melanoma abutting the optic nerve, with vision of 20/32. The linear diameter of the tumor was 18 mm and height was 5.1 mm. Seven years later (A) patient’s vision was 20/40 and the tumor had regressed (height: 2.5 mm). Twenty years after treatment (B) patient’s vision was 20/40 and the tumor continued to be regressed (height: 2.3 mm).
