eFigure. Magnetic Resonance Imaging in Case 2

This supplementary material has been provided by the authors to give readers additional information about their work.
**eFigure.** Magnetic Resonance Imaging in Case 2

3-Tesla MRI in Patient 2, showing a filling defect in the posterior limb of left horizontal semicircular canal (top panel) that appeared to shift in position following a vigorous head-shake within the scanner (bottom panel). Markers show the distance (mm) between the lateral most part of the vestibule and the canalith before and after a head-jolting stimulus. HSCC Horizontal semicircular canal.
