Subjective Outcomes on Health: Development Over Time for Simultaneous and Sequential BiCl

Scores of the per protocol data are presented in median values with an error bar representing the interquartile range. VAS: Visual Analogue Scale; HUI3: Health Utilities Index 3; EQ5D: Dutch EuroQol-5D; TTO: Time trade off; yr: year; CI: cochlear implant; preop: preoperative. Statistical analyses were performed between 1-year, 2-year and 3-year data, applying a Bonferroni correction. No statistical differences were found on all quality of life questionnaires between sequential and simultaneous bilateral cochlear implantation.
