Supplementary Online Content

eFigure. Calibration plot for the final models of risk for cancer-specific death.

This supplementary material has been provided by the authors to give readers additional information about their work.
eFigure. Calibration plot for the final models of risk for cancer-specific death. Blue line represents perfect calibration in which the predicted outcome corresponds perfectly with the observed outcome. Blue dots: patients with stage I-III resected PDAC; red dots: patients with stage I-III unresected PDAC and stage IV PDAC.
