Supplementary Online Content

eFigure 1. Forest plot for weighted mean difference in operating time for laparoscopic or open appendectomy.

eFigure 2. Forest plot for pooled odds ratio of the presence of intra abdominal collection following laparoscopic or open appendectomy.

eFigure 3. Forest plot for pooled odds ratio of wound infection after laparoscopic or open appendectomy.

eFigure 4. Forest plot for weighted mean difference in the length of stay in hospital following laparoscopic or open appendectomy.

eFigure 5. Forest plot for pooled odds ratio of presence of appendiceal perforation following laparoscopic or open appendectomy.

This supplementary material has been provided by the authors to give readers additional information about their work.
**eFigure 1** Forest plot for weighted mean difference in operating time for laparoscopic or open appendectomy. Weighted mean differences are shown with 95% confidence intervals.

**eFigure 2** Forest plot for pooled odds ratio of the presence of intra abdominal collection following laparoscopic or open appendectomy. Odds ratios are shown with 95% confidence intervals.

**eFigure 3** Forest plot for pooled odds ratio of wound infection after laparoscopic or open appendectomy. Odds ratios are shown with 95% confidence intervals.

**eFigure 4** Forest plot for weighted mean difference in the length of stay in hospital following laparoscopic or open appendectomy. Weighted mean differences are shown with 95% confidence intervals.

**eFigure 5** Forest plot for pooled odds ratio of presence of appendiceal perforation following laparoscopic or open appendectomy. Odds ratios are shown with 95% confidence intervals.
Figure 1 Forest plot for weighted mean difference in operating time for laparoscopic or open appendectomy. Weighted mean differences are shown with 95% confidence intervals.
Figure 2 Forest plot for pooled odds ratio of the presence of intra abdominal collection following laparoscopic or open appendectomy. Odds ratios are shown with 95% confidence intervals.
eFigure 3 Forest plot for pooled odds ratio of wound infection after laparoscopic or open appendectomy. Odds ratios are shown with 95% confidence intervals.
Figure 4 Forest plot for weighted mean difference in the length of stay in hospital following laparoscopic or open appendectomy. Weighted mean differences are shown with 95% confidence intervals.
eFigure 5 Forest plot for pooled odds ratio of presence of appendiceal perforation following laparoscopic or open appendectomy. Odds ratios are shown with 95% confidence intervals.
