eFigure. Range of Motion for Trunk Extension/Flexion

This supplementary material has been provided by the authors to give readers additional information about their work.
**Figure 1.** Range of Motion for Trunk Extension/Flexion
(A) Elongation of the umbilicus-xiphoid distance in maximal retroflexion compared to upright position before and at various time points after surgery.
(B) Finger-to-floor distance in maximal trunk flexion for the same time points. Data are presented as mean +/- SEM, statistical significance was determined by students t-test.
